TRANSFORMING AIR PURIFICATION

ODOGard®-Coated Filters

Smell Nothing™

MERV+ and HEPA+ Filters

the only filters that feature ODOGard® technology

What's in the **PLUS**?

MERV+ and HEPA+ are the only filters that feature **ODOGard® technology**, which quickly and permanently eliminates odors by bonding to odor molecules without the need of fragrances or masking agents.

Odor's Worst Enemy.

ODOGard changes the molecular structure of the offending smell. When the odor molecule is captured, ODOGard goes to work to scrub the stink, modifying the molecule until it is scentless. So unwelcome smells that have been lingering for days, weeks, months or even years can disappear for good in as little as 10 minutes.

A Powerful Fusion
of Technologies.

The combination of ODOGard and our other technologies work to reduce VOCs and allergens such as pollen and pet dander, and odors caused by mold, bacteria and other pollutants. Plus, it is lab-tested to inactivate 99.98% of SARS-CoV-2 from the air, the virus that causes Covid-19.*

* Laboratory tests prove to inactivate over 99.98% of SARS-CoV-2 in the air within 10 air exchanges in a controlled environment.

Filter Options

MERV+ Filter
- (Item # 1X5780 – Single filter)
- (Item # 1X5870 – 10-pack)

HEPA+ Filter
- (Item # 1X5827 – Room Model)
